

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

KraneShares Global Humanoid Robotics and Physical AI Index UCITS ETF Class USD Shares

KraneShares Global Humanoid Robotics and Physical AI Index UCITS ETF (the “Fund”)

Class USD Shares (ISIN: IE000O6Z73N7) (the “Class”)

A Fund of KraneShares ICAV (the “ICAV”). The Fund is managed by Waystone Management Company (IE) Limited (the “Manager”).

Objectives and investment policy

The Fund seeks to provide investment results that correspond generally to the price and yield performance of companies involved in the advancement of humanoid and embodied intelligence technology or acting as a supply chain solution for a humanoid and embodied intelligence company (“**Embodied Intelligence Companies**”). Embodied Intelligence Companies are companies which have been classified within certain activity groups within The Refinitiv® Business Classification, which are related to humanoid and embodied intelligence.

The Fund is passively managed and will seek to achieve its objective by tracking the performance of the MerQube Global Humanoid Robotics and Physical AI Index (the “**Index**”) as closely as possible. The Index is composed of 50 Embodied Intelligence Companies which are selected using a proprietary scoring system which takes minimum market capitalisation and liquidity requirements into account. Components are weighted equally at each quarterly rebalance, based on their prices five days prior to rebalance. Under normal circumstances, the Fund will invest at least 80% of its net assets in securities of Embodied Intelligence Companies or in depositary receipts representing securities of the Index. Depositary receipts are securities issued by a financial institution which evidence ownership interests in a security or a pool of securities deposited with the financial institution. The Fund seeks to hold all the securities of the Index with the approximate weightings that they have in the Index. The Fund in certain, limited circumstances, where replication of the Index is not reasonably practical may also invest in instruments that are not included in the Index but are securities which provide similar price and yield performance and risk profiles to constituents of the Index.

The Fund does not intend to use financial derivative instruments. Although the Index is generally well diversified, because of the market it

reflects, depending on market conditions, the Fund may, in order to track the Index accurately, hold positions in individual constituents of the Index up to 20% of the Fund’s Net Asset Value.

The Fund’s investment policy and the nature of the Index means that the Investment Manager will not generally be able to take Sustainability Risks (as defined in the supplement) into account in making investment decisions.

Save in exceptional circumstances, the Fund will only issue and redeem shares of the Fund (“**Shares**”) to certain institutional investors. However, other investors may purchase or sell Shares through brokers on one or more stock exchanges. The Shares trade on these stock exchanges at market prices which may fluctuate throughout the day. Market prices may be greater or less than the daily Net Asset Value of the Fund. The Fund may engage in securities lending but does not intend to use repurchase agreements or total return swaps.

The Fund may invest up to 10% of its Net Asset Value in other regulated collective investment schemes, including other exchange traded funds.

Shareholders may redeem Shares on any Business Day (as defined in the Fund supplement) and any other day at the Directors’ discretion provided Shareholders are notified in advance. A list of dealing days for the Fund is published on <https://kraneshares.eu/>.

The Fund’s base currency and the class currency of this Class is U.S. Dollars.

The Fund’s income will be reinvested and the Fund does not intend to declare dividends.

Please refer to the ICAV’s prospectus and the supplement in respect of the Fund for more information.

Risk and reward profile

Lower risk Higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

← Typically lower rewards Typically higher rewards →

The risk category above is not a measure of capital loss or gains but of how significant the rises and falls in the Fund’s return are predicted to be.

- The risk reward category shown is based on historic data which may not be a reliable indication for future performance of the Fund.
- The risk category shown is not guaranteed and may shift over time.
- The higher the category, the greater potential for reward, but also the greater the risk of losing the investment.
- The lowest category does not mean risk free.
- The Fund is in category 7. The Fund is in this category due to the nature of its investments and their recent price volatility. This means that the Shares may be subject to significant increases and decreases in price.

Significant risks for the Fund not taken into account in this indicator include the following:

- **Concentration Risk:** The Fund may invest in a relatively small number of investments or concentrate its investments in a specific industry sector. As a result, investments may be more volatile than a more diversified investment.

- **Index Tracking Risk:** The Fund’s performance may not track the Index exactly. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund’s portfolio and other Fund expenses.
- **Liquidity Risk:** In stressed market conditions, the nature of the Fund’s assets may result in the Fund not being able to process all redemption requests in line with its usual procedures and timeframes.
- **Holdings and Sector Concentration:** The Fund may be concentrated in a specific industry sector and the NAV of the Fund may be more volatile as a result of this concentration.
- **Emerging Market including China:** Investments in emerging market including China may involve a higher risk of financial loss than investments in more developed countries due to lower liquidity and possible lack of adequate, legal, social, political and economic structures, protection and stability as well as uncertain tax positions.
- **Equity Risk:** The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.
- **Index Related Risk:** The Fund tracks the performance of the Index. As a result, the net asset value of the Fund’s assets is directly dependent on the performance of the Index. Losses that could be avoided via active management will not be offset.
- **Risk related to Stock Connect Programs:** The Fund may be investing in China A Shares via the Shanghai – Hong Kong

StockConnect and the Shenzhen-Hong Kong Stock Connect which may entail additional clearing and settlement, regulatory, operational and counterparty risks.

For full details of the relevant risks reference should be made to the risk factors sections of the prospectus and supplement.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser.
Entry charge	0.00%	
Exit Charge	0.00%	Entry and exit charges are not applicable to investors buying/selling Shares on a stock exchange, but such investors will do so at market prices and may be subject to broker fees and/or other charges.
These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.		As the Class has not yet launched, the ongoing charges figure is an estimate based on the expected total charges. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry/exit charge by the Fund when buying or selling units in another collective investment scheme.
Charges taken from the Fund over a year		For more information about charges, please make reference to fees and expenses section of the prospectus and supplement.
Ongoing Charge	0.69%	
Charges taken from the Fund under specific conditions		
Performance Fee	0.00%	

Past performance

The Class does not yet have sufficient data to provide a useful indication of past performance to investors.

Fund launch date: 26/09/2025.

Class launch date: 26/09/2025
