

## KraneShares MSCI China A Share UCITS ETF

KraneShares MSCI China A Share UCITS ETF is "A sub fund of KraneShares ICAV (the "ICAV"). The ICAV is authorised as a UCITS in Ireland and regulated by the Central Bank of Ireland.

For Investors in the United Kingdom (UK). Investors should read the Key Investor Information Document and Prospectus prior to investing. The Fund seeks to track the performance of an index composed of companies from developed countries.

### Investment Strategy

KBA is benchmarked to the MSCI China A Index which captures large and mid-cap representation across China securities listed on the Shanghai and Shenzhen exchanges (A-shares). Over the coming years, MSCI will complete the incremental inclusion of China A-shares into their Global Standard Indexes, including the MSCI Emerging Markets Index, which may potentially benefit the securities KBA holds today. The MSCI China A Index is designed for global investors accessing the A-share market using the Stock Connect framework and is calculated using China A Stock Connect listings based on the offshore RMB exchange rate (CNH).

### MSCI China A-Share Inclusion Overview:

- China A-Shares are vastly underrepresented in global indexes. While the United States has a weight of 55.59% in the MSCI All Country World Index, China only has a weight of 4.19%<sup>1</sup>.
- MSCI is incrementally realigning China's overall weight in their Global Standard Indexes through the inclusion process, and by the end of 2019, MSCI's definition of China will include 264 large-cap and 172 mid-cap A-Share securities, including 30 securities from the ChiNext board<sup>2</sup>.
- Upon completion, China A-Shares are predicted to account for over 17% of the MSCI Emerging Market (EM) Index<sup>3</sup>.

**With \$1.8 trillion tracking the MSCI EM Index alone<sup>4</sup>, the MSCI inclusion could trigger significant institutional flows from both passive and active managers into the A-Share securities that KBA holds today.**

Fund Details	As of 31/Dec/2019
Exchange	London Stock Exchange
Management Fee	40bps

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its stated objectives. The Funds are subject to political, social or economic instability within China which may cause decline in value. Fluctuations in currency of foreign countries may have an adverse effect to domestic currency values. Emerging markets involve heightened risk related to the same factors as well as increase volatility and lower trading volume.

Narrowly focused investments typically exhibit higher volatility. Internet companies are subject to rapid changes in technology, worldwide competition, rapid obsolescence of products and services, loss of patent protections, evolving industry standards and frequent new product productions. Such changes may have an adverse impact on performance.
